### Top Five Lowest Stages

Period of Record - 1904 to September 30, 2016

Date	Crest (ft)	Flow (cfs)	Remarks
7/3/1904	missing	0	Possibly incompatible with comtemporary flow records
10/16/2007	-0.47	missing	none
4/17/2002	-0.42	missing	A flow of 21 was recorded on 2/21/2002 with a stage of -0.27
6/26/2016	-0.23	28	Also occurred 10/2/2000 but only one reading that day so questionable with a missing flow
6/15/1999	-0.22	missing	Also occurred 6/13 - 14/1999

### Additional Low Stage Information

Date	Crest (ft)	Flow (cfs)	Remarks
10/26/2015	-0.16	30	Also occurred 9/6/2015

### Additional Remarks

Low water records are somewhat limited. Therefore some low stages could be missing. Our low stage listing includes valid and sometimes questionable stages. In some cases we have a brief list of questionable stages since it was unclear if the readings were due to a gauge malfunction or there wasn't enough data to determine its validity. Low stage (if found) are listed if there hasn't been any low stages in the last 15 years. The USGS sometime tweak their readings so please contact the USGS if you need more information.
